Hetty Rose Vegetable Leather Clutch

£159

In these times of pulling in the purse strings, recycling fashion and seeking out vintage pieces has never been more in vogue. Designer Hetty Rose is renowned for re-using and re-working vintage

materials to make gorgeous shoes. She has now branched into accessories and this vegetable tan leather clutch bag is just one example. Not

only is this tanning process kinder to the environment but Hetty proves her sustainable ways by using pieces of vintage Japanese kimono fabric, seen here in the cute bow detail.
